A team may compete with less than 4 members.

Any communications between participants from the same team during the event will be sufficient cause to eliminate the team from the event. The exception to the rule is during the team activity.

Cell phones must be shut off and out of sight

Participants may not use cameras or camera phones.

All participants are to wear pants and closed toe shoes or boots.

Safety equipment needed for operation of equipment will be provided by the contest superintendents

Students are STRONGLY ENCOURAGED to attend the plant and tool review that will immediate follow the completion of the CDE. Please prepare your team to review for 30 minutes.

Tie Breakers: Should a tie occur in the individual scores the highest score on the general knowledge Exam will be used to break the tie. If the tie cannot be broken using the test score, Plant ID will be used

Equipment : Contestants are required and allowed to bring: Clipboard#2 Pencil and a non-programmable basic function calculator and scales.

Components of the CDE

Team Activity

This practicum involves team members working together toward accomplishing a goal. It is designed to evaluate individual and group contributions regarding knowledge, evaluation and decision making. The National FFA Nursery Landscape score sheet will be utilized for scoring.

Even Year : Team will analyze a landscape sit problem and provide a solution to the problem. Judging will be based on team preparation (25 minutes) and on presentation (5 minutes). While advanced preparation is highly encouraged, no notes will be allowed into the CDE.

ODD Years Teams will analyze completed landscape drawings and make a sales presentation to the client. Judging will be based on team preparation (25 minutes) and presentation (5 minutes)

Individual Events

General Knowledge: The examination will consist of 50 multiple choice questions. Based off of the questions posted on the CAAE website and from National Nursery Landscape General Knowledge tests years 2011-2016 (these will not be posted to the CAAE but are available through National FFA).

Plant Identification: Participants will identify 50 items selected from the **Ct Plant List**. Plants to identify will be presented as intact live species. Each specimen will correspond with the number of the plant on the attached plant list. Identification stations will present a plant, tool, insect or disease or weed to identify. Each item will correspond with a number on the attached list. A card with the letter A, B, C or D will be placed next to each specimen; the participant will locate the number on the plant list corresponding to that specimen. The question number on the scanning sheet will then be marked with the letter accompanying the specimen

Tool & Equipment, Insect and Disease, Weed Identification Participants will also identify 50 tools, equipment, insect and disease and weeds as selected from the attached National CDE list. Identification stations will present a plant, tool, insect or disease or weed to identify. Each item will correspond with a number on the attached list. A card with the letter A, B, C or D will be placed next to each specimen; the participant will locate the number on the identification list corresponding to that specimen. The question number on the scanning sheet will then be marked with the letter accompanying the specimen.
